(54) Title: DETECTION OF INTERFERING SIGNAL IN RADIO RECEIVER

#### (57) Abstract

A method and equipment for detecting an interfering signal in a time division multiple access (TDMA) radio receiver, in which case samples are taken (50) from a received signal in symbol sequences over a TDMA timeslot (20, 21, 22), a signal path corresponding to the TDMA timeslot, or a portion thereof, is generated by a modulation detector (12), an error estimate representing the erroneousness of the signal path generated is determined (51), the error estimate is compared (52) with a predetermined threshold value, and the reception of the interfering signal is recognized (53) if the error estimate is greater than the predetermined threshold value.

Box I	Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)
This inte	mational search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. 🛛	Claims Nos.: 2-3,6-7 because they relate to subject matter not required to be searched by this Authority, namely:  See next page
2.	Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
	· · · · · · · · · · · · · · · · · · ·
	_
Вох Ц	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
"This Inte	rnational Searching Authority found multiple inventions in this international application, as follows:
1.	As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.	As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4.	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark	on Protest The additional search fees were accompanied by the applicant's protest.
	No protest accompanied the payment of additional search fees.
Form PCT/	ISA/210 (continuation of first sheet (1)) (July1992)

Interna 1 application No. PCT/r199/00443

The claims 2-3 and 6-7 are not considered to be clear and concise and they are not considered to be fully supported in the description (see PCT articles 6 and 17).

In claims 2 and 6, it is uncertain if the applicant means that the half timeslot is a predetermined sequence or not:

In claims 3 and 7, it is unclear what the applicant means by using symbol sequence specific sample points and reference constellation points for calculating the error.
